deconex[®] HT 1163

Mildly alkaline cleaning concentrate for aluminium

For use in ultrasonic cleaning systems

Application

deconex[®] HT 1163 is a liquid, mildly alkaline cleaning concentrate which was especially developed for degreasing aluminium in ultrasonic cleaning systems.

It is suitable for both pre-cleaning and final cleaning.

Properties

deconex® HT 1163 cleans aluminium very gently.

Furthermore, the product considerably reduces the surface tension of the cleaning solution and, due to its good wetting capability, effectively removes widely different oils and greases.

deconex[®] HT 1163 does not contain any silicates or complexing agents and therefore, subsequent electrochemical treatments will not be influenced.

Ingredients

Alkalis, surfactants, dispersing agent

Dosage

In practice, the following dosage has given good results:

Dosage	Temperature	Exposure time
3-5%	50-70 °C	3-10 min

The use of softened water is recommended.

Material compatibility

Suitable for: For Aluminium, non-ferrous metals, zinc, tin, stainless steel, precious metals

For materials not mentioned please make your own specific compatibility tests or consult Borer Chemie AG.

Chemical/physical data

рН	1% solution in demineralized water	approx. 8.6
Density	concentrate	1.03 g/mL
Appearance	concentrate	transparent, yellow liquid

Availability

Please ask your local representative about current container sizes.

Containers, screw caps and labels are made of recyclable polyethylene.

Additional information

For information concerning safety at work, storage and waste disposal/effluent, please consult the corresponding safety data sheet.
