

Improve
your cleaning
processes with
Borer Chemie

Benefit from a unique combination
of services:

- In-house chemical laboratory
- In-house research and development, including analysis department
- Process simulation using various cleaning systems and your USPs
- Practical process simulations which combine and simplify planning and test execution

Combine high-quality cleaning agents
with the latest system technology.

In contrast to resources-consuming testing on your own premises, you can now try out potential systems technology and chemicals for your process version in our Technical Center before they are put to work in your company.

Try it out for yourself:

- Create your specifications with the future solution using the state-of-the-art technologies and media that are available for you in our Technical Center
- Develop your tailor-made cleaning, passivation or decoating process with our support on realistic production lines
- We support you as a neutral partner in your root-cause analysis - with us you find the cause and the solution
- We support your validation team with professional engineering studies

The **deconex**® training
and testing centre
combines high quality
cleaning agents with
«state-of-the-art systems»
technology

We follow future-
focused, process
engineering imple-
mentation options
in industrial parts
cleaning which go
beyond standardised
process and
technology designs.

deconex® – aqueous cleaning
media and processes in a wide range
of industrial applications:

- Medical technology industry
- PVD/CVD Coating technology
- Precision parts e.g. watch industry
- Vacuum and semiconductor technology
- Optics / ophthalmics industry
- Flat panel display technology
- Photovoltaics
- Tools and Mould manufacturing technology

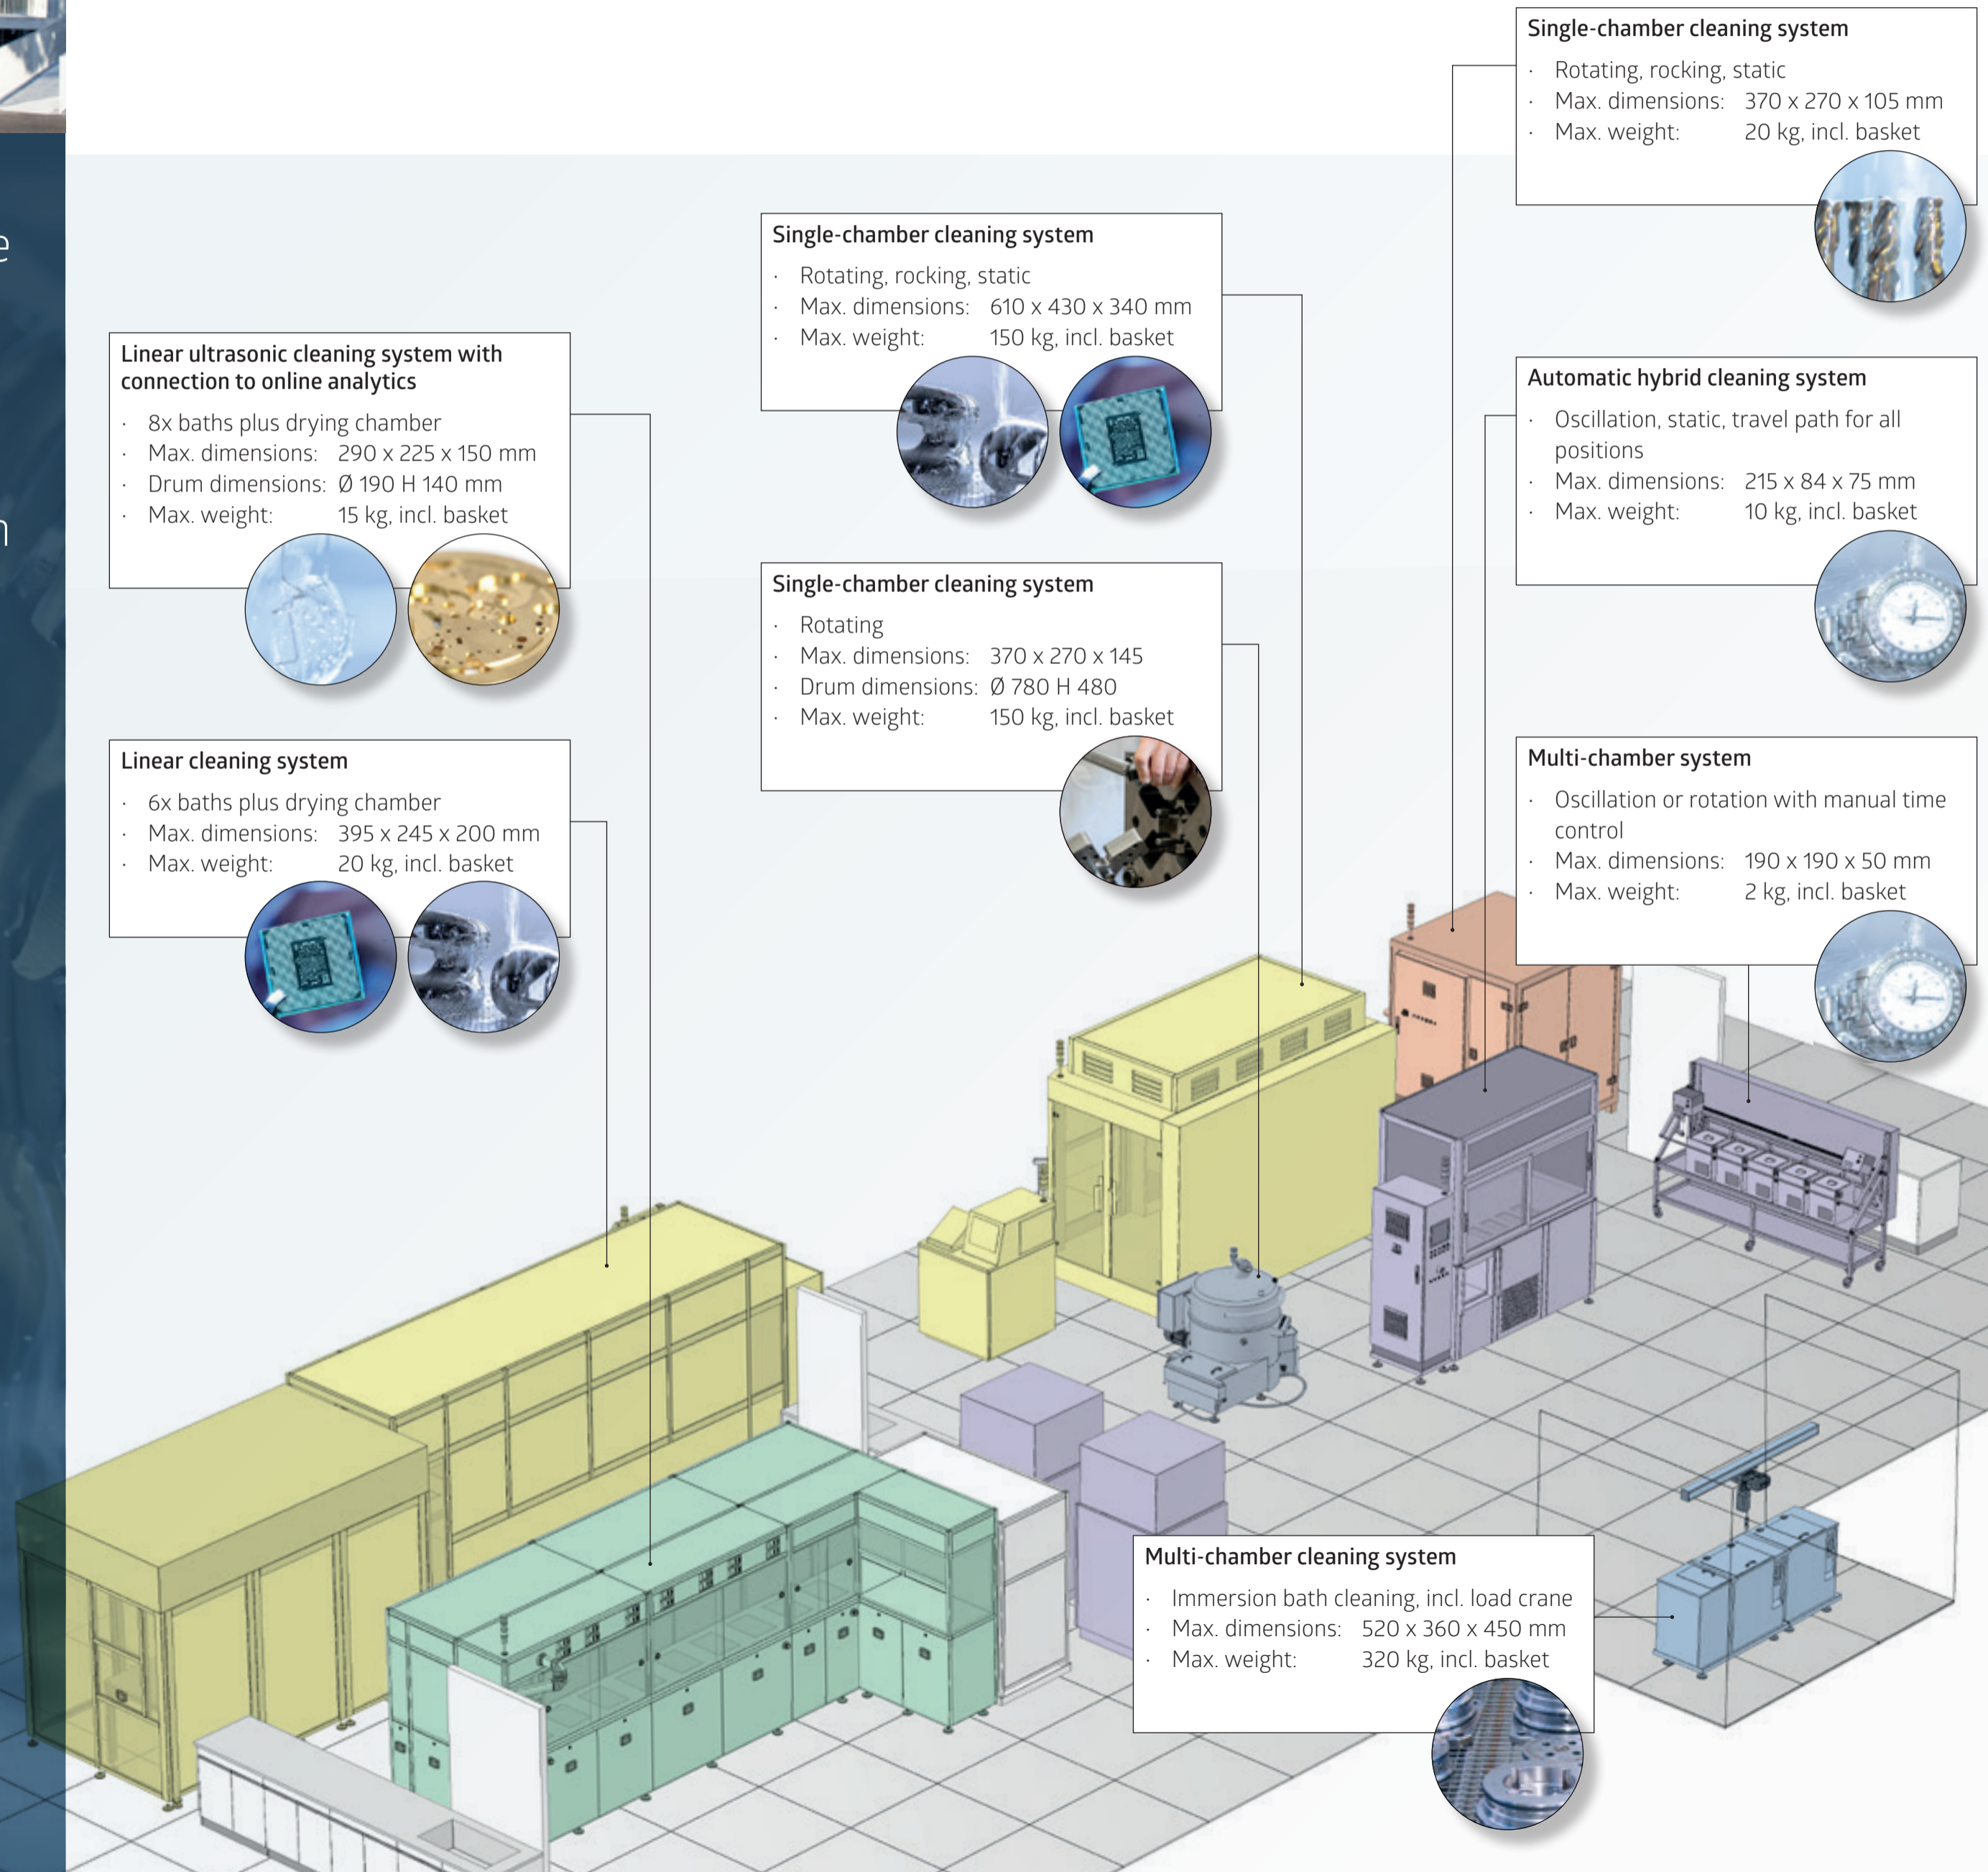

The «**deconex**® Training and Test Center» delivers future-orientated applications for water-based cleaning chemicals

Try it out for yourself: Our current machine park consists of:

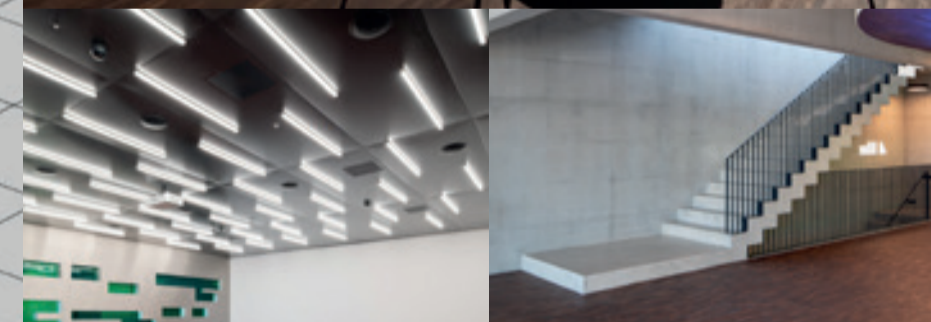

Benefit from comprehensive services in our 320 m² test center:

- tests on different, modern cleaning systems for dipping and spraying processes
- Test and analysis reports for your application / requirement / task
- Support from our experienced technicians and chemists, from the beginning of the project to the implementation in your company.

- High Purity / Medtech (HPC / MT)
- Cleaning ready for coating (PVD I)
- Cleaning ready for coating (PVD II)
- Precision parts / watches and jewellery
- Mould cleaning (MC)
- Repair and maintenance

We look forward to your visit to our **deconex**® training and test center
